**1. Read the passage carefully and answer the Following questions:**

A mammal is an animal that breathes air, has a backbone and grows hair at some point during its life. In addition, all female mammals have glands that can produce milk. There are 5,000 species or kinds of living mammal. Mammals range in size from a tiny bat to a huge whale. Mammals are warm- blooded. This allows mammals to live in a wide range of climates. They have highly developed brains. Their brain allows mammals to learn from experience and adapt their behavior. Most mammals live on land-on the ground, in trees, or even underground. Some mammals –including otters, beavers, and seals- live on land and in the water. Whales, dolphins and manatees are mammals that spend their whole life in water.
